

HoloTerminal

Unique design, technical brilliance

Elegance that works.
Transmits messages with
crystal clarity
and brightness –
to rent or buy.

HoloTerminal will display your information and presentations in a way that is guaranteed to attract attention – even in a bright environment. Videos, animations or combinations of pictures and text come to life on **HoloPro™**.

Unlike traditional terminals, technology takes a completely background role with **HoloTerminal** – leaving design to play the starring role. The puristic glass element can be adapted to suit any surroundings. The curved glass screen with a 30" **HoloPro™** film laminated into it will make your message look as if it is floating in the room.

HoloPro™

Eye-catching Transparency

Less is often more

Floating pictures that transport information with crystal clarity. The technical equipment (projector, computer) is situated in a fixed position in the base of the **HoloTerminal**.

Floating pictures with crystal-clear presentation.

HoloTerminal - benefits at a glance:

- Sophisticated and modern presentation
- Appealing, timeless design
- Usable in broad daylight
- Can be used at fairs, exhibitions and events
- Saves space
- Easy to set up

The **HoloTerminal** is supplied with a MacMini or a MiniPC.

The base of the **HoloTerminal** protects the technical equipment.

The **HoloTerminal** is easy and safe to transport in its specially designed flight case on rollers.

All you have to do when you arrive at your location is unpack it and plug it in.

The show can start!
